

WOCE-MET Acknowledgements

24 January 2002

Flux fields available at the WOCE SAC were produced with the help of many people both at FSU and other institutes. We first wish to acknowledge the personnel of WOCE-MET whose efforts make this disk and the FSU winds possible. We thank James Stricherz, David Legler, Rosario Romero, Jennifer Lovell and Jesse Enloe and our programmers Jiraporn Whalley, Weijuan Shi, Mark Bennett, and Peter Gavin. We further acknowledge the professional support of Dr. James J. O'Brien, Dr. Mark A. Bourassa, and the remainder of the personnel at the Center for Ocean Atmospheric Prediction Studies (COAPS).

We also express our gratitude to Simon Josey, Peter Taylor, and Elizabeth Kent at SOC and Sergio Derada and his colleagues at FNMOC and NRL for providing their Flux products.

Financial support for WOCE-MET was provided by the National Science Foundation/Physical Oceanography Section. Scatterometry funding provided by the NASA/OSU SeaWinds project and the NASA OVWST project. COAPS receives its base funding from the Physical Oceanography Section of the Office of Naval Research.
